Professional Summary

Computer Engineering Technology student and aspiring Web Developer with a strong foundation in both front-end and back-end technologies. I am always eager to find new opportunities, learn through hands-on experiences, and grow as a person and a developer. I enjoy blending technical problem-solving with creative design to build engaging, responsive websites and applications.

Experience

Freelance Web Developer & SEO Specialist

Freelance | Project: Pathwise (2026)

- Managed the SEO strategy for Pathwise, optimizing website content, structure, and keywords to improve search engine visibility and overall online presence.
- Built and customized website pages using Wix, focusing on responsive design, user experience, and creating a professional and functional website.
- Worked directly on a freelance project from planning to implementation, identifying website improvements and delivering solutions based on project requirements.

Technical Skills

- **Front-End Development:** HTML, CSS, JavaScript
- **Back-End & Programming:** Python, C++, SQL (Database Management)
- **CMS & Web Platforms:** WordPress, Wix, Search Engine Optimization (SEO)
- **Design & Prototyping:** Figma
